

## INVITATION

### Move towards sustainable lifestyles for the people and the planet

Thursday 10 December 2015, 15:00-18:00

Venue: ZAC – Salle Jean Dame - 17 Rue Léopold Bellan, 75002 Paris  
(Metro Bourse, or Sentier)

In the context of the campaign [Change for the planet – Care for the people](#), CIDSE promotes a prophetic new narrative of human well-being within creation, gender equity, and solidarity, with an economy at the service of society within planetary boundaries. There is a need to move towards a just, equitable and sustainable use and distribution of global resources by citizens of the world. This workshop aims at creating a space to share experiences and alternatives of people coming from different countries and contexts, citizens already living the change we are calling for and that political decision makers are late to deliver on. Discussions will focus on food and energy consumption and production practices.

#### PROGRAMME

Introduction by Heinz Hoedl, President of CIDSE

Keynote address:

- Representative of the Rural Women's Assembly (South Africa)
