

ACF, CCFD-TERRE SOLIDAIRE AND CIDSE
ARE PLEASED TO INVITE YOU TO A SIDE-EVENT ON

UNDERSTANDING AGRICULTURE IN RELATION TO INDUSTRIAL FOOD SYSTEMS, COMPENSATION AND FOOD SECURITY

TUESDAY, 15th NOVEMBER 2016
3 pm TO 4.30 pm - ROOM BERING

Speakers:

Diego Pacheco, Head of delegation of Bolivia

Hans Herren, IPES-Food member

Kelsey Perlman, Land use policy officer, Carbon Market Watch

Francesco Tubiello, Senior statistician, FAO (to be confirmed)

Summary:

The discussions on agriculture at the UNFCCC are trapped in the mitigation/adaptation divide, which hampers progress on the issue. If adaptation, emissions reduction and carbon sequestration are essential to tackle climate change and its impact, they need to be addressed separately in order to reach a comprehensive approach to food security.
